

Lt. Col. Kevin J. Lovell

Lt. Col. (Retired) Kevin J. Lovell studies and applies the arts of leadership and history and the sciences of warfare, engineering, and management. His professional study and education included project and program management, continuous process improvement, strategic planning and implementation, and organizational design and leadership. He applied theory from these specialties in his career across the US, Europe, Asia, and the Middle East. Kevin led matrix teams to complete initiatives during military service in the Afghanistan, New York, Omaha, and Chicago Districts, US Army Corps of Engineers, and in US Army units in Germany, Bosnia, Uzbekistan, Korea, Afghanistan and Iraq. He led process and organizational improvement initiatives for Department of the Army's Headquarters, Office of Business Transformation and the establishment and implementation of the Army's large-scale renewable energy project development office, the Energy Initiative Task Force (now Office.)

Lt. Col. Lovell holds a BS in Mechanical Engineering from Marquette University, an MS in Management from the University of Maryland University College, and is a graduate from the US Army Intermediate Level Education, Command and General Staff College. He holds Project Management Professional (PMP) and Lean Six Sigma (Black Belt) credentials.

Most recently, Lt. Col. Lovell served as a senior project manager and program manager in the private sector where his teams delivered projects and cross-functional programs for Federal, International and Domestic clients in water, energy and transportation infrastructure. He established a Program Management Community of Practice focused on improving project and program delivery and knowledge development and distribution.
